i want to make a usb with a live iso on it (and that can be booted from ubuntu) how to i do this? also when i open up the usb-creator.exe there is no option for windows 8 my experince with this dongle is very bad... i have dongle that cannot access anymore.... nathanel, one does not exist for windows8, i wonder what it is for 8.1. how can i create an live iso without a dongle ? i use this to install: ubuntu 13.10 does not support 8.1 Hi... how do I make /etc/rc.local executable? without shell access? tgywa, sudo chmod +x /etc/rc.local OerHeks, it is not needed on Ubuntu 13.10? OerHeks, okay hi how can i make a live ubuntu iso without usb or dongle? guys how to run and kill specific programs at booting my ubuntu skandak, that is not a ubuntu issue, maybe you find a ppa or install custom scripts? hm i guess i can do it with a plugin to dns can i do this with dns plugin? skandak: edit your /etc/rc.local and put "su -c 'program to start' program to kill" oke guys can u tell me how to make autorun.sh or

/etc/rc.local executable? chmod +x it chmod +x it?? 82157476af
